

Play Math 24

If one of your goals with your mentee is to improve his math skills, consider this the perfect game! Math 24 teaches kids how to solve problems using all different combinations of arithmetic. It is fun, competitive, and addicting! Time will fly when playing Math 24. If your mentee asks to bring friends or classmates to the mentoring session, this would be a great game to play (up to four players).

Talk to your school coordinator and ask if they already have the card game. (If not, it is very affordable and would make a great addition to the mentoring cabinet of games.)

Check out these sites to learn more about the game or purchase your own:
